

Mirror Extender Fitting Guide (MPW-SVG-0163-02)

1, To begin remove the existing mirrors and place them to one side.

2, Next offer up one of the Extenders and pass one of the Bolts through it and tighten into the threaded hole the original Mirror was removed from. Lightly nip this bolt up now.

3, Now take the correct Mirror for the side of the bike you are working on and wind the Mirror into the mounting position on the Extender.

4, Lastly for this mirror move both the Extender and Mirror until you find the desired position/angle which gives you the comfiest and best rear image.

5, With the final position known you can fully tighten both the Extender and the Mirror.

6, Repeat Steps 2-5 to complete the other side of the bike.

That is, it the install is complete, and you should go for a well-deserved test ride.
