

Tool Tube Fitting Guide (MPW-SVG-0963)

1, Firstly offer up the Tool Tube to the bike and decide on its location.

2, Next pay attention to the 2 mounting Tabs and decide how you would like to attach the Tube to the bike, be it screws, cable ties or straps.

3, Now think about any painted surfaces the Tabs may touch and how you want to protect those areas from rubbing.

4, With Steps 1-3 complete you can now offer up Tool Tube and attach it to your bike via your chosen method. (Note no fixings are supplied)

5, Once fitted check it isn't hindering any moving parts of the bike or your riding position.

6, To use the Tool Tube simply unwind the Lid like a bottle, place your desired tools inside and screw the lid back on firmly.

7, Tip, you might want to wrap any loose items in a cloth to prevent rattling.

That is, if the install is complete, and you should go for a well-deserved test ride.
